Bachelor of Computer Application(8.03)

KESHAV VIDHYA NIKETAN H.SEC SCHOOL

2014

12th Standard (57.6/100)

KESHAV VIDHYA NIKETAN H.SEC SCHOOL

2012

10th Standard(65/100)

SKILLS

C, JAVA(Basic), Python(Basic) Data Structure, Algorithm, OOPs, DBMS, SQL, HTML

PROJECTS

Weather forecasting using DataMining

Weather Project application is a web-based application where you will be able to access all reports related to weather forecasts for any locations. Its location detected by your browser setting and server configuration will automatically identify the location and be able to present its weather information such as temperature, wind direction, rainfall, humidity etc

Crime Rate prediction using Machine learning

the project is to predict the crime rate and analyze the crime rate to be happened in future. Based on this Information the officials can take charge and try to reduce the crime rate. The system will look at how to convert crime information into a regression problem, so that it will help detectives in solving crimes faster.

Frontend of e-shopping website named "RateIt".

I worked on the frontend of this project.I used HTML, CSS and for backend they use Mysql .In this project customer has the right to bargain.

CERTIFICATIONS

Programming Foundations with JavaScript, HTML and CSS in Coursera.

International Conference on presenting a paper entitled "WEATHER FORECASTING USING DATA MINING"

Programming for Everybody (Getting Started with Python)

HOBBIES

Learning new skills and Technologies

Playing Cricket and Badminton
